## Install Igo Primo Windows Ce 6

Newer is not always better! - Primo NextGeneration is a completely new development.. Finally, your device should have at least 64MB of RAM, we recommend 128MB or more.. How to do it??? Windows CE is not available as a retail product You can buy licenses for Platform Builder, which will let you build and install custom versions.. You may try it, but be aware NextGen is not fully developed (yet) while for everything a specific license is required.. That license is limited in time, location and feature, possibly device dependent as well.. Additional features, other languages Whatever, are not part of this guide\*\*\*\*\* System Requirements for IGO PRIMO Obviously you need a device with an WinCE Operating System (OS).. Igo Primo Windows Ce 6 Download And InstallInstall Igo Primo Windows Ce 6 Igo Primo Windows Ce 6 Download And Install\*\*\*\*\* Before we start, I have 3 important advises.. zip, often only a 480\_272 or 800\_480 If your resolution is not supported, Primo won't start.. Make sure that the Primo you download supports YOUR resolution Not all downloads have a multires data.. (CE4 2 will do for IGO8 3) IGO Primo CE supports devices that have 320x240, 480x 234 (very rare), 480x272 and 800x480 screen resolutions.

4 provided by Chas521 on this forum somewhere Important: - Newer builds are released from time to time.. How do you know? This information could be in the post with the upload or you could ask the uploader.. Or when already downloaded, you could open (!!) the data zip ui\_igo9 folder and see in an instant the resolution folders.. The available memory will decide the goodies and eye candy \*\*\*\*\* Installation Download a version of IGO Primo.. Also read this: You are not allowed to view links About GPS problems 'Autodetecting GPS' means you need to enter the GPS settings in 59s.
